## Profile

I am a highly motivated individual with an ambition to keep developing and learning in the CGI field. I am confident with software such as Maya, Zbrush, Photoshop and Substance Painter and dedicated to broadening my knowledge of Houdini and Unreal Engine. I have experience in graphic design and interest in both 3D and 2D creative processes. I love learning and try to experiment in everything I do.

## Education

2018-2020: Peterborough Regional College

- Pearson BTEC Level 3 Extended Diploma in Art and Design

2020-2023: Nottingham Trent University

- BA(Hons) Animation (Pending)

## Experience

May 2019: Poster for Sacrawell Farm

December 2021: Animated video for the Science department in NTU (Live brief). Team project.

February 2022: Illustrations and book covers for publishing house Musagena. Commissioned commercial work.

February 2023: Illustrations for publishing house Musagena. Commissioned commercial work.

## Skills and Interests

I have a very good knowledge of Maya and Zbrush and I am sufficient in the use of Houdini. In my free time I keep improving my knowledge of Houdini and specifically how to create particle systems and hair grooming. I regularly practice sculpting and strive to improve my knowledge of human face and figure anatomy. The rest of my time I spent practicing my ideation and 2D drawing skills by designing book covers and creating illustrations according to client's specifications. When not creatively engaged I like to take nature walks, cook and exercise in the gym.
